TITLE	Federal Funding to Two Year Colleges, Fiscal Year 81.
INSTITUTION	National Council for Resource Development, Washington, D.C.
PUB DATE	81
NOTE	77p.
AVAILABLE FROM	American Association of Community and Junior Colleges, One Dupont Circle, NW, Washington, DC 20036 ($5.00).
EDRS PRICE	MF01/PC04 Plus Postage.
DESCRIPTORS	Community Colleges; *Educational Finance; Endowment Funds; *Federal Aid; Federal Programs; *Financial Support; Grants; National Surveys; *Resource Allocation; Scholarship Funds; *Two Year Colleges

ABSTRACT

This report is designed to provide a comprehensive picture of funding by federal agencies to two-year colleges during fiscal year 1981. Tables provide information on the source of funding; specific programs funded; the amount of funds authorized; the amount appropriated; funds obtained by two-year colleges; total number of awards; total number of proposals submitted; number of awards to two-year colleges; and the number of proposals submitted by two-year colleges. This information is provided by agency and agency subdivision including the Departments of Education, Energy, Health and Human Services, and Labor, the National Endowment for the Humanities, National Institute of Mental Health, the National Science Foundation, and University Year for Action. The report also includes a summary of Department of Education funding for vocational and adult education by state, program, and amount. The report concludes with a summary and analysis of the changing directions of funding, by agency and division, and includes the following observations: (1) significant reorganizations have moved many programs, especially within the Department of Education; (2) overall, funding for educational projects has been reduced; (3) levels and directions of funding in the future are extremely uncertain; and (4) there are still many programs where two-year colleges can compete effectively for funds. FISCAL YEAR

SUITE 410 · ONE DUPONT CIRCLE, N.W. — WASHINGTON, D.C. 20036

AN AFFILIATE COUNCIL OF THE AMERICAN ASSOCIATION OF COMMUNITY AND JUNIOR COLLEGES

PREFACE

The sixth annual report on Federal Funding for fiscal year 1981 was prepared by the Task Force Committee of the National Council for Resource Development, an affiliate Council of the American Association of Junior/Community Colleges. The Committee, under the leadership of co-chairpersons Lillian Hammond from Shelby State Community College and Lora Conrad from Northwest Alabama State Junior College, are to be commended for the endless hours of dedicated effort and commitment to the task that went into completion of this Report. Together the co-chairpersons and committee members have provided a valuable service to the membership and have helped to advance the Council toward its goal of equitable funding from federal sources for two-year colleges.

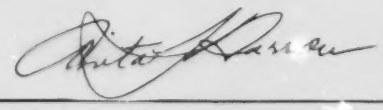
In addition to spending many hours collecting data, committee members made a special effort to strengthen working relationships with agency personnel. The Council has made an impact on many funding agencies as a direct result of personal contacts being made by Task Force Committee members over the years. The program staff are more aware of the needs and concerns of community/junior colleges, better understand the mission and capabilities of community/junior colleges, and readily recognize the ultimate goal of the Report is increased funding awards for community/junior colleges.

The Report is a valuable tool and should be carefully studied by all resource development professionals. It provides information regarding which grant opportunities have a high funding potential based on the record of the past five years. For each selected federal funding program, the following information is provided: Dollars Authorized, Dollars Appropriated, Dollars Obtained by Two-Year Colleges, Total Number of Awards, Total Number of Proposals Submitted, Number of Awards To Two-Year College, Number of Proposals Submitted by Two-Year Colleges . In addition, an analysis of these data and the changing directions represented is included.

Wide distribution of the Report occurs at the Annual NCRD Conference; in addition, the Legislative Impact Committee has established a plan for distributing the Report to key congressional members and staff. It is up to you as resource development officers to see to it that your senators and representatives are aware of the Report and understand the statement it makes regarding funding for the two-year colleges.

We must continue to communicate the mission, capabilities and needs of community/junior colleges to key decision-makers, strive to improve the professional quality of proposals submitted by our respective institutions, increase the number of qualified two-year college personnel who serve on reader-review panels, and continue to stay abreast of changes in legislation and regulations to ensure that two-year colleges remain eligible for federally funded programs. In order to gain equitable funding in the future, each NCRD member must play an active role; I challenge each of you to strive diligently to become more professional in proposal preparation, agency cultivation and legislative oversight. We have come a long way since the inception of NCRD and the first Federal Funding Report, but we still have a long and arduous struggle ahead.

Again, special appreciation is extended to Lillian Hammond, Lora Conrad and the Task Force Committee for their support of Council objectives and the professional quality of the Report.



Anita J. Harrow, Ph.D. NCRD President 1981

All federal agency personnel contacted for information for inclusion in this report gave their assistance willingly to help make this report as complete and accurate as possible. Special appreciation is extended to them.

Cover art was provided by Richard Halvorson of Washington Community College.

Correspondence to Task Force members and the voluminous, detailed task of preparing this material for the printer were ably handled by Pam Welborn of Northwest Alabama Junior College.

Printing was by Franklin County Printing, Inc., Russellville, Alabama

Appreciation is extended to Elise Martin of Shelby State Community College for her assistance in conducting the survey and compiling the assessment data as well as corresponding with agency personnel.

Task Force Co-Chairs for this report were Lora Conrad, Northwest Alabama Junior College, Phil Campbell, Alabama 35581, phone (205) 993-5331 and Lillian F. Hammond, Shelby State Community College, 1588 Union Avenue, Memphis, Tennessee 38104, phone (901) 528-6807.

Special appreciation is extended to the President of Northwest, Charlie Britnell, and to the President of Shelby, Dr. Karen Bowyer, for extending the support necessary for Lora Conrad and Lillian Hammond to serve as Task Force Co-Chairs.

INTRODUCTION

This report on Federal Funding to Two-Year Colleges is designed to provide as comprehensive a picture as possible of funding by federal agencies directly to two-year colleges. The agencies and programs included in this report are those where two-year colleges could reasonably expect to be competitive in seeking program support. This report in no way seeks to include all programs in the Catalog of Federal Domestic Assistance for which two-year colleges are technically eligible, but rather includes as many programs as possible that have funded two-year colleges in the recent past or are presently funding two-year colleges.

Due to the massive scope and the individual state distribution of funds, data on State Vocational Education Appropriations and CETA Governor's Grants are included on'y at the state level. The individual state offices could provide more specific data.

The funding period covered by this report is October 1, 1980, through September 30, 1981, unless exceptions are noted on a specific data sheet.

The economic feasibility constraints of a volunteer group and the time constraints of attempting to collect final data to be published only two months after the fiscal year ends, may mean certain programs were omitted or some data was incomplete. Every effort was made to validate the information collected by mailing typed, formatted copies of the data back to the agency source for review, though a short response time frame was necessary. In a few cases information was not yet available or was incomplete due to the late, often uncertain funding schedules agencies were constrained to follow during this past year.

The data in this report presents an essentially accurate profile of federal funding levels to two-year colleges and the trends in that funding, yet is presented so as to be timely in meeting the needs of council members for this information.

This report will, hopefully, be utilized by the NCRD membership--development officers nationwide, the NCRD Board of Directors, the leadership of the American Association of Community and Junior Colleges, Presidents of two-year colleges, state two-year college leadership, members of Congress, and federal agency personnel. It can be helpful to the membership in identifying likely funding sources, and in assessing the past performance of a program in funding two-year proposals as opposed to the total pool of proposals submitted. The leadership of NCRD, AACJC, and other state and national two-year college groups can utilize this information to identify legislative and program priorities for the future, and to identify those areas in which two-year colleges do or do not receive an equitable share of the funding to postsecondary education. This report can serve as a resource to legislative and agency personnel in assessing and reviewing funding priorities so as to provide equitable funding among types of postsecondary education institutions.

In using this report, the following notes should be helpful. The overall organization of the data is alphabetical by agency reviewed. Related programs, usually administered by one office or branch are reported together. Where appropriate, the Catalog of Federal Domestic Assistance numbers are included beside the program title. When available, data from the 1980 Task Force report are included in parentheses right under the

current data. When current data were not available for one or more items, NA appears. Footnotes provided by Task Force Committee members are often included which clarify the data, or state some significant point that did not fall within the data headings.

a. No authorization for FY 1982.
b. Thirty-Two new awards and 70 continuations.
c. New proposals submitted.
d. Awards are new and continuations.
e. Expected authorization for FY 82 is $5.0 million. This will provide continuing program money only. No new proposal solicitation is expected.
f. Includes two supplemental awards. Total number of projects in FY 81 is 40.
g. Includes authorization for Expanded Function Dental Auxiliaries and Dental Team Practice.
h. There is language in the Act that permits authorization. However, there are no funds appropriated for 1982.
i. Awards and dollars listed are to Associate Degree Nursing programs at 2-year and 4-year colleges and hospitals.

e. These awards are made to individuals, not to, or through, institutions of any kind. Therefore, the data will not accommodate these categories.
f. Includes $205,000contributed by NIE and $246,807 contributed by NSF (DISE Program).
(Data for 1980 in parentheses)

LATE REVISION: Science Faculty Professional Development $376,616 obtained by 2 year colleges in 1981; 89 proposals submitted by 2 year colleges in 1980.

NCRD FEDERAL FUNDING TASK FORCE REPORT FY 1981

OFFICE OF HUMAN DEVELOPMENT
ADMINISTRATION ON AGING

PROGRAM NAME	DOLLARS AUTHORIZED	DOLLARS APPROPRIATED	DOLLARS OBTAINED BY TWO-YEAR COLLEGES	TOTAL NUMBER OF AWARDS	TOTAL NUMBER OF PROPOSALS SUBMITTED	NUMBER OF AWARDS TWO-YEAR COLLEGES	NUMBER OF PROPOSALS SUBMITTED BY TWO-YEAR COLLEGES

a. Continuations, all awards made in FY 1979 for three year period.
(Data for 1980 in parentheses)

b. Includes all three of the following projects.

SUMMARY, ANALYSIS, AND COMMENTS--CHANGING DIRECTIONS

INTRODUCTION. Changing directions and lower levels of funding summarize what has happened to federal funding to education, including two-year colleges, in fiscal year 1981. Reorganizations during the past year have moved many programs, especially within the Department of Education. These changes are reflected in the content and organization of this report as compared to last years Categorical Aid report. Some of these changes are described in the analysis that follows. Budgetary cut backs for 1981 and those planned for 1982 and later years impact this report and even now are affecting resource development activities at most two-year colleges.

This year, rather than featuring specific agencies or programs, the highlights and major impacts on each agency for fiscal year 1981 as reported by each sub-committee on the Task Force or impacts now anticipated on future funding are reported herein so as to give a broad view of the changes taking place.

ACTION. Funding for University Year for Action continued at the same level in 1981 as in 1980. However, no funds are presently authorized for fiscal year 1982 for this program.

DEPARTMENT OF EDUCATION- EDUCATIONAL RESEARCH AND IMPROVEMENT. Most programs under this office in fiscal 1980 were moved in 1981 and several will become part of the state administered Block Grants Program as outlined by Secretary T. H. Bell for 1982. Consumers' Education is now under School Improvement and is scheduled to be part of the Block Grants Program in 1982; the Fund for Improvement of Postsecondary Education has been moved under Postsecondary Education and is reported there; Metric Education and Ethnic Heritage studies were moved under Elementary/Secondary Education and are now scheduled to be part of the Block Grants Program in 1982; Women's Educational Equity was also transferred to Elementary/Secondary Education; Regional Programs for Handicapped Persons were placed under Special Education and Rehabilitative Services. Except for FIPSE, these programs are not included in this report.

The future of Library Title II-A funding is questionable. It has been criticized as not targeted toward needy institutions but does have support in Congress because there is very little red tape associated with the program. It is widely distributed and has a positive effect on Libraries because the required maintenance of effort has encouraged institutions to improve their Libraries. Carol Henderson of the American Library Association cited the lowered authorization over several years from an original $30,000,000 to $5,000,000, lowered funding levels from $5,000,000 down to $3,000,000 and individual grants lowered from $1,900 to $1,200 as an indication that the program is losing impetus. Two-year colleges have fared well in this program and continue to need both the additional resources and the continued initiative to maintain current or increased funding levels for their own library improvement.

DEPARTMENT OF EDUCATION- INTERNATIONAL EDUCATION. Funds for the division of International Education are appropriated to the division and not to the individual programs within it. The fiscal year 1981 appropriation for all International Education programs totaled $28,000,000. The Fulbright Programs received a fiscal year 1981 appropriation of $6,200,000. The $28,000,000 appropriation included programs specifically designated for graduate institutions as well as the general program. (Participation by two-year colleges in these is not appropriate). While funding for International Education in fiscal year 1982 is not assured, programs within the division will probably be funded at approximately the same level in fiscal year 1982 as in fiscal year 1981, except that no funds are

planned for the International Understanding Program in fiscal year 1982. International Education personnel are highly sensitive to the needs of community and junior colleges in these programs, as evidenced by the agency brochure entitled "International Education Programs and Services of Interest to Community and Junior Colleges" which may be obtained on request.

DEPARTMENT OF EDUCATION- POSTSECONDARY EDUCATION. Both Special Programs for the Disadvantaged and the Strengthening Developing Institutions Program (Title III) continued to be major funding sources for two-year colleges with dollars obtained by two-year colleges slightly higher in fiscal year 1981 than in fiscal year 1980. Both anticipate funding to continue at about the same level in fiscal year 1982.

Potentially, Title III funding for two-year colleges could dramatically increase since the law now specifies a funding floor rather than funding ceiling for those colleges. However, the prolonged uncertainty concerning Title III regulations and eligibility criteria does not permit any more definite statement. Two-year colleges compete very successfully in the Special Services, Talent Search and Upward Bound Programs. Approximately 78 percent of all two-year proposals submitted in fiscal year 1981 were funded with approximately 80 percent of the total proposals submitted being funding.

Cooperative Education funding increased in fiscal year 1981 by 53 percent. This was reflected in larger grant sizes rather than in more awards. The number of awards to two-year colleges was actually fewer in fiscal year in 1981 than in fiscal year 1980. Two-year colleges are eligible to apply not only for administration grants but also for demonstration, research, and training grants under Title VIII.

Continuing Education received only administrative funds in fiscal year 1981 and may be abolished in fiscal year 1982. The Biomedical Sciences program is becoming part of the Block Grants Program. The Veterans Cost of Instruction Program will be cut; even its continuation is uncertain.

The programs under Postsecondary Education have historically been and continue to be especially important to two-year institutions. These programs have been critical in enabling many institutions to adequately fulfill the mission of serving their communities.

DEPARTMENT OF EDUCATION- VOCATIONAL AND ADULT EDUCATION. Programs under the division of Adult and Vocational Education are forward funded which is not the case in most other divisions. Fiscal year 1981 federal grant year funds are used for school year 1981 and 1982 expenditures as is shown under Attachment A--Vocational and Adult Education. Since these funds are administered at the state level, two-year colleges are advised to contact their respective state Adult and Vocational Education Offices to determine how, or if they may, become recipients of a portion of the state allotments given in Attachment A. Within these allotments each state must award at least 15 percent of the funds designated Basic Grants and Program Improvement to the Postsecondary and Adult Education Program. An additional 10 percent of the funds will be awarded to the handicapped; 15 percent, to the disadvantaged.

Attachment B- Vocational and Adult Education reflects the Adult Education state allotments for fiscal year 1980 and for fiscal year 1981. This $100,000,000 is divided among the states according to the formula that is specified in the Adult Education Act. This formula basically gives $150,000 to each state plus an additional amount that is determined by the number of adults in the state who are eligible for Adult Education services. State agencies handling Adult Education should be contacted regarding the funding in a specific state.

A total of 10 percent of all Vocational Education funds are designated for the division of National Vocational Programs which usually awards contracts for specific research in Vocational Education. Within this program awards to two-year institutions have been scarce. All projects funded by this division must be of national scope and include a series of national workshops.

The Vocational Education legislation has been extended through 1983-84; however, a draft of the new legislation is not yet available. This is anticipated to include major changes such as excluding set-asides for special interest groups.

DEPARTMENT OF ENERGY- EDUCATIONAL PROGRAM DIVISION. Faculty Development Program funding continued in fiscal year 1981 at the same level as in fiscal year 1980; however, awards to, and dollars obtained by, two-year colleges declined significantly. Though two-year colleges submitted fewer proposals, this was not sufficient to account for the drastic decline in the number of awards. There are no funds set-aside specifically for two-year colleges under the Faculty Development Program. Since the Department of Energy may be dismantled, the location or status of the Faculty Development Program for fiscal year 1982 is uncertain.

DEPARTMENT OF HEALTH AND HUMAN SERVICES. Funds available in the Department of Health and Human Services were significantly less in most projects in fiscal year 1981 than in fiscal year 1980. Funding to two-year colleges from Health and Human Services has been primarily from Nursing Special Projects and Nursing Capitation. Only a few awards have been made to two-year college by other projects. Unfortunately, funding to both Nursing Special Projects and Nursing Capitation was cut drastically in fiscal year 1981, with slightly over one-third of the total dollars designated for Nursing Capitation going to associate degree nursing programs in 1981. (Associate degree programs include two-year colleges, and some four-year colleges, and hospital programs.) The anticipated discontinuation of Nursing Capitation in fiscal year 1982 will be adversely felt by several hundred two-year colleges around the country who have been receivig Nursing Capitation funds in the last few years. Nursing Special Projects is expected to be continued into fiscal year 1982 though at a reduced funding level. Both continuation grants and some new grants are anticipated under revised funding priorities, and two-year colleges can continue to compete for these funds.

Some education programs within the Department of Health and Human Services are not faring well at all in fiscal year 1982. Authorization is not anticipated for either Nursing Capitation or for Training in Emergency Medical Services, Medical Records Technician, Dental Hygiene, Radiologic Technician, Medical Laboratory Technician, Occupational Therapist, Environmental Health Technician, Respiratory Therapy, Vision Care Technician, Dietitian, Emergency Medical Technician, Expanded Function Dental Auxiliary, and Curriculum Development for Geriatrics. Continuation awards, however, are anticipated in the Physician Assistant Training project.

Those Allied Health Special Improvement Projects which had not received funding or had not funded two-year colleges in the past three years are not included in this report though some of them have been included in prior reports.

DEPARTMENT OF LABOR. The programs reported under the Department of Labor: the Comprehensive Employment and Training Act (CETA)- Governors' Grants and Job Corp Advanced Career Training Program (ACT), are administered very differently from the majority of the programs in the Federal Funding Report. The CETA-Governors' Grants are awards made directly to the states for administration in five categories (See Department of Labor Table). CETA has come under much attack, has had its funding reduced, and may have only two of the five types of grants in operation in fiscal year 1982. Plans for education and training programs within the Department of Labor will need to be watched closely by all two-year colleges in the coming months.

The ACT training program contracts for person-slots at colleges throughout the country. Fiscal year 1980 appropriations were used to fund 2,104 person slots in 99 colleges. Twenty-five percent of these were minority colleges (The percentage of two-year versus four-year colleges was not available). Fiscal year 1982 funding of this program is uncertain also.

NATIONAL ENDOWMENT FOR THE ARTS. The National Endowment for the Arts (NEA) is an independent agency which receives annual appropriations that have grown from an initial funding level of $2,500,000 in 1966 to a record high of $158,560,000 for 1981. This money is expended through 16 different program divisions which fund organizations and individuals. Traditionally, postsecondary institutions have not been major recipients of these funds. In 1981 only 9 awards were given to two-year institutions from all program divisions within NEA. This low level of funding to two-year colleges is consistent with the NEA funding pattern for the last several years. All program divisions which have provided no funding to

two-year colleges for the past three years were omitted from this report. NEA does not keep detailed data on its applications in summary form, therefore, the data included in this document was hand calculated from funding source documents within the NEA office with the assistance of NEA staff. Insufficient data were available to determine the number of applications from two-year colleges although indications are that not very many two-year institutions make application for funding. NEA officials, who are interested in well-designed proposals from two-year colleges and are willing to work with two-year college personnel to identify appropriate programs for which two-year colleges might apply, view two-year institutions as a largely untapped resource that could bring increased cultural resources to their public service areas.

NATIONAL ENDOWMENT FOR THE HUMANITIES. Like NEA the National Endowment for the Humanities (NEH) is an independent federal agency. NEH was created to support research, education, and public activity in the humanities as a result of a determination by Congress that federal funds should complement and assist the support for the humanities provided by state and local governments and private sources. Data reported for NEH as well as grant data from several other agencies in this Federal Funding Report are presently incomplete because NEH and other agencies did not receive their final fiscal year 1981 appropriation until September 1981. Most NEH support to two-year colleges is provided through the division of education programs. During fiscal year 1981 a total of 43 awards were made through these programs to two-year colleges; 29 Consultant grants, 9 Pilot grants, 1 Implementation grant, and 3 Higher Education/Regional/National grants. Two-year institutions submitted fewer applications to the NEH education division in fiscal year 1981, than in 1980. However, more applications were funded than in previous years. Program staff encourage two-year institutions to apply for NEH funding.

The budget for NEH for fiscal year 1982 is uncertain though cutbacks are anticipated. Cutbacks from the often discussed 12 percent to almost 50 percent have been considered. The extent of those cuts will determine which programs are affected. Interested individuals should watch closely the legislative process and should consult with NEH education division personnel. At the present time, three programs are scheduled for termination because there have been so few applications submitted in recent years. These are: Seminars and Fellowships for the Professions, Residencies for College Teachers, and Fellowships for College Teachers.

NEH staff are helpful and willing to work with two-year institution representatives. Persons interested in applying should contact program officers regarding funding levels and status. Program descriptions may be obtained from the publication "Overview of Endowment Programs for 1982-83" available from the NEH Public Affairs Office, M.S. 351, 806 15th Street NW, Washington, DC 20506.

NATIONAL INSTITUTE ON DRUG ABUSE. The National Institute on Drug Abuse received no appropriation for any of its programs for the past two years. None is anticipated for fiscal year 1982. As a result the National Institute on Drug Abuse is not included in this report. Community colleges did not fare well in seeking funding under the National Institute on Drug Abuse when funds were available.

NATIONAL INSTITUTE OF MENTAL HEALTH. The National Institute of Mental Health funds primarily graduate and postgraduate training, except under the Mental Health Clinical Training Program. Two-year colleges are not encouraged to apply for Mental Health Research Grants nor for Mental Health Research Training Grants. Very few two-year proposals have been submitted even in the Mental Health Clinical Training area although several awards have been made to two-year colleges. No new awards are planned by the National Institute of Mental Health for fiscal year 1982, though continuation of currently funded projects is anticipated. By fiscal year 1983, the National Institute of Mental Health will make no awards-- new or continuation.

NATIONAL SCIENCE FOUNDATION. The National Science Foundation is an agency of the federal government designated to support scientific research and education projects in the mathematical, physical, environmental, biological, social, behavioral, and engineering sciences. Within NSF, the Science Education Directorate specifically addresses education. That directorate has four divisions which include a total of twenty-three programs. Of these twenty-three programs,

two-year colleges or their faculty are eligible for those 15 which are included in this report, although awards were made in fiscal year 1981 to two-year colleges or their faculty from only 7 programs.

Two-year colleges have received no funding under Science and Society Programs for the past two years. Under the Science Education Resource Improvement Division, two-year colleges received the majority of their support. Programs such as CAUSE, ISEP, and LOCI have encouraged two-year applications and have provided funding to significant numbers of two-year institutions though at a lower funding level than the overall percentage of proposals funded. Especially noteworthy progress however has been observed in the ISEP program where 45 percent of the two-year proposals submitted to ISEP in fiscal year 1981 were funded. The Science Education Development and Research Division will accept proposals from two-year colleges but anticipates two-year colleges will not be frequent recipients of their grants as national demonstration projects are sought. Awards under the Scientific Personnel Improvement Division are limited entirely to individual faculty awards.

Funding prospects for the National Science Foundation are uncertain at this time. Cutbacks are certain but the extent of those cutbacks is unknown. Programs and proposal due dates are expected to be impacted as well as dollars available. Keep in close contact with NSF program personnel and with your legislators.

OFFICE OF HUMAN DEVELOPMENT- ADMINISTRATION ON AGING. The Office of Human Development-Administration on Aging provides only a small portion of its funding to two-year colleges. All current projects are continuation awards made in fiscal year 1979 for a three year period. Two-year colleges have received funding in the last three years only under the Gerontology Career Preparation--Two Year Undergraduate Projects. Numbers of proposals submitted by all sources and by two-year colleges were not available so the funding success ratio can not be determined. However, two-year awards were approximately 25 percent of the total awards under the Gerontology Career Preparation--Two and Four Year Undergraduate Projects.

Funding appropriations for the Administration on Aging have been cut significantly meaning that fiscal year 1982 estimates are for only 30 to 35 new awards in the Gerontology Career Preparation area instead of the current 66 funded projects.

REGIONAL COMMISSIONS. The Regional Commissions are not included in this report since all except the Appalachian Regional Commission have been eliminated and as of September 30, 1981, all regional offices and federal offices in those commissions have been closed. Check previous reports if their funding history is sought.

The Appalachian Regional Commission, however, is anticipated to continue. It has been active for about 17 years and is specifically designated to serve the Appalachian mountain region from southern New York to northern Mississippi including all of West Virginia and parts of twelve other states: Alabama, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, and Virginia. No more current data was available than 1980, in which $18,000,000 or 13.8 percent of all Appalachian Regional Commission funds were awarded to vocational and other educational projects through 138 awards. Data specific to the funding of two-year colleges were not available.

ARC, which has been funded for fiscal year 1982 at a reduction of 25 percent from fiscal year 1981 funding levels, will, however, be awarding educational grants of approximately $14,000,000. NCRD members located within the region designated should contact their state or local district development offices for more specific information regarding the availability of ARC funds within their region.

CONCLUSION. As is clearly evident in the preceding paragraphs, funding levels and directions are exceedingly uncertain at this time. Though there are significant overall reductions in dollars available for funding all educational projects there are still many programs where two-year colleges can compete effectively for federal funding dollars. All resource development officers should maintain a close liaison with their legislative offices and close contact with program officers in those areas in which they are interested in seeking funding. With the increased emphasis on state adminsitered Block Grants, knowledge of individual state processes and practices will be more essential.
